Yash Chaudhary

AI/ML Engineer - Generative AI - Mumbai, India

ychaudhary161@gmail.com | +91 7387389187
LinkedIn | GitHub

PROFILE

Computer engineering graduate pursuing an M.Tech in Computer Engineering, with internship experience across machine learning, Generative AI, and software development. Interested in building practical intelligent applications with LLMs, retrieval-augmented generation, and applied machine learning.

EDUCATION

M.Tech in Computer Engineering 2026-2028

Dwarkadas J Sanghvi College of Engineering, Mumbai

B.E. in Computer Engineering - CGPA 8.3 / 10 2021-2025

St. John College of Engineering & Management, Palghar

EXPERIENCE

Data Science with GenAI Intern Nov 2025-Mar 2026

Innomatics Research Labs

Built a Gemini API chatbot, a YouTube-to-article pipeline, and an enterprise RAG Q&A system on Amazon Bedrock. Developed an MLOps workflow for Flipkart sentiment using Prefect, MLflow, and Optuna.

Artificial Intelligence & Machine Learning Intern Jun-Jul 2025

Edunet Foundation (AICTE)

Built a salary-prediction application with Flask and Scikit-learn using feature selection and cross-validation.

AI/ML Virtual Intern Jul-Sep 2024

Eduskills Foundation (AWS)

Compared regression models and automated preprocessing for model development.

Machine Learning Intern Dec 2023-Jan 2024

TechnoHacks EduTech

Worked on wine-classification and diabetes-prediction projects, including model selection and evaluation.

SELECTED PROJECTS

Enterprise Knowledge Base Q&A System

Amazon Bedrock - RAG - Streamlit - AWS EC2 - IAM

Semantic retrieval over private documents with citation-backed responses and an IAM-protected application.

Financial Advisor AI Chatbot

Gemini API - LangChain - RAG - FastAPI - AWS EC2 - CI/CD

A conversational assistant combining curated sources, retrieval-augmented generation, and multi-turn context.

Yash Chaudhary

Selected projects, skills & credentials

SELECTED PROJECTS

Yonex Sentiment MLOps Pipeline

MLflow - Prefect - Optuna - FastAPI - AWS - DVC

A sentiment-analysis workflow spanning scheduled retraining, experiment tracking, tuning, versioning, and API serving.

Tree Detection & Health Monitoring

YOLOv7 - PyTorch - OpenCV - Flask - REST API

Computer-vision workflow for tree detection and health-status analysis from satellite imagery.

Financial Document Management with Semantic Analysis

FastAPI - Qdrant - Sentence Transformers - SQLite

Work-in-progress application for financial-document records and semantic retrieval over text chunks.

ElpCare Elder Healthcare Platform

React - Flask - Kotlin - REST API - Hugging Face NLP

Cross-platform healthcare application combining web and Android clients with a Flask API and NLP chatbot.

TECHNICAL SKILLS

Programming & ML: Python, JavaScript, SQL, TensorFlow, PyTorch, Scikit-learn, XGBoost, Pandas, NumPy

Generative AI, LLMs & RAG: Amazon Bedrock, LangChain, RAG, embeddings, vector databases, Gemini API, NLP

MLOps & development: MLflow, Prefect, Optuna, CI/CD, Docker, DVC, FastAPI, Flask, Streamlit, React, Kotlin

Cloud & data: AWS EC2, GCP, Firebase, PostgreSQL

CERTIFICATIONS

Agentic AI Certified Foundations Associate - Oracle - Nov 2026

AI Skills Passport - Microsoft EY - Oct 2026

Data Science & Analytics - HP LIFE - Jul 2025

AI Fundamentals - IBM SkillsBuild - Jul 2025

Prompt Engineering for Everyone - IBM - Aug 2024

Machine Learning Onramp - MATLAB - Jan 2024

Data Science with Python - Simplilearn - Aug 2022

Python - Game Dev with PyGame - GUVI - Jul 2022

Credential titles and dates reflect the existing portfolio record. Certificate scans and verification URLs were not supplied.
